

macafi

the healthy way to life.....

Tip Top User Guide

macafi
Improving Your Health!

- ◆ Far infrared role in the human body, there are three main characteristics: First, direct, the second is a resonance absorption, and the third is a strong penetration;
- ◆ Activating cells, water molecular resonance in body, and oxygen content increase: Human resonance absorption of far infrared make cell activation molecule, in a high-energy state, the human body needs to accelerate the synthesis of the enzyme, activation of protein and other biological macromolecules, thereby enhancing immune function, repair damaged cells, and enhance the human biological tissue regeneration. Accounted for approximately 70% of the proportion of body water, but also constitute the major components. Make water molecules resonate by far infrared in body, the water molecules cracking, reorganizing into smaller water molecules. In this process the aging macromolecule absorbed on the surface of the corporation to remove dirt, and can increase the oxygen content of water molecules, thereby enhancing sport energy, which will help to eliminate toxins and excess body fat in order to achieve within support outside the health effect of weight
- ◆ Improve microcirculation: The primary function of the micro-circulation is delivered oxygen and nutrients to tissue and take away the waste produced by metabolism. If this system can not operate normally, there will be a variety of illness. Such as rheumatoid arthritis, cold hands and feet, limb weakness, hypertension, cardiovascular disease, periarthritis, sciatica, cataract, the elderly characteristics, it can produce thermal effects deep into the subcutaneous tissue, combined with the water molecules have resonance, expansion of capillaries can speed up the movement of blood, thus restoring vitality microcirculation.
- ◆ Promote blood circulation and enhanced metabolism: As far infrared to improve micro circulation and dredge venation, but also blood flow, accelerate blood circulation and promote fresh blood tissues and cells can quickly remove metabolic waste, human tissue vitality will be doubled.

Suitable for the following diseases:

Acute contusion, the muscles, nerve pain, and neck disease, shoulder inflammation, rheumatism, convulsion and bone joint inflammation etc. with some drug, will have the cure effect for the disease of high blood pressure, high blood fat, chronic gastritis etc.

It especially suit for white-collar office worker with strain & tired, the middle-age & elder, and the sub-health people.

Not suitable for the following diseases:

- ◆ Patient for tumor, cancer, jakang, tuberculosis and fester inflammation.
- ◆ Patient for diabetes, high-flush, skin allergy and bone injure without recovery.
- ◆ Patient with serious heart disease and equipped with cardiac pacemaker.
- ◆ Being equipped with others metal apparatus as artificial limb, the pregnant women.
- ◆ Patient for neurosis, very serious disease.

Warning before using this therapy / machine / product read the below link care fully
